

Fruit Garden

Next to vegetables there is nothing more important than fruit in the garden and it's just so easy; what better way than growing your own, to truly know what you are eating?

We have been selling fruit by mail order for over forty years. Year on year we have many repeat customers - this is testament to our quality!

Great care is taken with mail order despatch. All fruit trees before despatch are carefully inspected, shaped where we deem necessary, and in some instances root pruned to encourage fibrous new roots.

Pollination - A subject that confuses all. We have tried to make life easy! From our listing you will see much of what we sell is self-fertile (does not require a pollinator). For items that require a pollinator we indicate this as such. So what pollinates what? All apple varieties we grow are capable of cross pollinating each other; similarly all cherries we grow will cross pollinate each other - and the same goes for pears, gages and plums. With regard to Triploid trees, these either need one self fertile tree or two non-fertile pollinators to ensure fruit production. The simple rule, when buying from us is any apple will pollinate any apple, any cherry will pollinate any cherry etc. Should you be require more assistance please contact us.

Size Of Fruit Trees

Whilst there are exceptions most of our fruit trees are approximately 4-5ft tall at time of dispatch. Mulberries, Figs, Fruit Bushes and Fruit Canes are of smaller size but of good quality. Trees are sent bare-root during the Winter months and potted during the Summer months. You can expect fruit in the first season on the apple varieties, almonds, cherries, pears etc will probably fruit next season and Walnuts, Sweet Chestnuts and mulberries in their third year after planting. Most of our fruit can be grown in tubs on your terrace or in the open ground. Concrete or wooden tubs are best – avoid plastic as after a couple of years they often split open.

Seasonality / Availability

Much of our fruiting stock is available all year round. Please check our website or telephone to check availability of particular varieties. Should you wish to place an order for stock that is not currently available we shall take a 25% deposit at time of order if the value is more than £30, the remainder will be debited from your card on or shortly before despatch date. If the value of the order is less than £30 full payment will be taken at the time the order is placed. For visitors have a good range of pot grown trees throughout the year - always check by phone or email for availability.

Gardening Books We can also offer the following books, which we believe are excellent.

Successful Grape Growing For Eating And Wine-Making

It is a very practical guide that is packed with information about grape growing - an extremely popular book.

146 pages (slightly smaller than A4), softback, £12.95

Success With Apples And Pears to Eat & Drink

Includes advice on husbandry, planting, cultivation, training, pest and disease control, harvesting and storing.

130 pages (slightly smaller than A4), softback, £12.95

Chestnut Tree Stake & Tie

All stakes are cut from our newable woodland here at the nursery. 24" soft PVC buckle tree tie with a hoop collar spacer, great for offering support to trees when used with a stake.

4ft (1.2mtrs) Stakes only: £3.00 each, 3 or more £2.95 each, 5 or more £2.90 each, 10 or more £2.85 each.

6ft (1.8mtrs) Stakes only: £4.25 each, 3 or more £3.95 each, 5 or more £3.80 each, 10 or more £3.70 each

4ft Stake & Tie: £4.50 each, 3 or more £4.25 each, 5 or more £4.15, 10 or more £3.95.

Ties only: £1.50 each, 3 or more £1.45 each, 5 or more £1.40 each, 10 or more £1.30 each.

Tubex Easy Wrap Tree Guards

Essential where rabbits can be a problem. Translucent green in colour these guards are manufactured from environmentally acceptable polypropylene (no PVC). They are more rigid than spiral alternatives and provide a greater protection due to their twin wall design – offering the combined benefit of herbicide and rabbit protection, as well as limited protection from 'over zealous' strimming! 0.75m in height (approximately 2 ½ feet). 50 mm (approximately 2") in diameter expanding to 65mm (2½" in diameter).

£1.80 each, 3-5 £1.70 each, 5 -9 £1.60 each, 10 or more £1.50 each.

Carriage Charges

Our processing and packing charges are calculated on weight, where you are in the country and when you would like your order dispatched.

£4.25 for a lightweight small parcels (up to 2kg)

£9.95 for heavier larger parcels, delivered to mainland England on a standard

7-10 delivery. If you are outside this area (including IOW) please ring or visit our website for further details.

Next day delivery options are available.

Apples

All apples are £19.95 each, 3 for £56.85, 5 or more £18.00 each. You can mix and match with Cherries, Damsons, Pears (except Asian Pears), Plums, Medlars and Gages to take advantage of the discounts.

Grown on M26 root stock for an ultimate (un-pruned height) height of 8-12 feet but can easily be kept at a height of 6-8 ft.

Grown on MM106 root stock for an ultimate (un-pruned) height of 12-15 feet but can easily be kept at a height of 6-8 ft

Apple 'Annie Elizabeth'

Excellent cooking apple for the North of England being extremely hardy. Sweet fruit - does not require sugar. Season of use October - April. First introduced in 1857, Leicestershire, UK. Triploid. MM106

Apple 'Ashmead's Kernel'

Pale green aromatic eater with a unique acid drop flavour, excellent keeping qualities. Season of use October - February. First introduced in the 1700's, Gloucestershire, UK. Requires a pollinator (another apple). MM106

Apple 'Blenheim Orange'

Russet. Crumbly texture with a distinctive nutty flavour. An excellent dual purpose apple suitable for both eating and cooking. Season of use October - December. First introduced in 1740, Oxon, UK. Triploid. MM106

Apple 'Bramley's Seedling'

Excellent cooking apple - the classic. Season of use October - February. First introduced in 1809, Nottinghamshire, UK. Triploid. M26

Apple 'Claygate Pearmain'

Russet. Popular eater in Victorian times with a nutty aromatic flavour. Good keeping qualities and both disease and scab resistant. Season of use December - February. First introduced in 1821, Surrey, UK. Requires a pollinator (another apple). MM106

Apple 'Court Of Wick'

Delicious West Country variety with a strong fruity flavour. Very hardy. Season of use September - December. First introduced in 1790, Somerset, UK. Requires a pollinator (another apple). MM106

Apple 'Cox's Orange Pippin'

Eating Apple. Crisp, juicy orange-red fruits. Considered by many to be the best of all dessert apples - and certainly a British favourite! Self Sterile. M26

Apple 'Devonshire Quarrenden'

Unusual variety with a distinct strawberry flavour best when eaten from the tree. Season of use August. First introduced in 1676, Devon, UK. Self fertile. MM106

Apple 'Discovery'

Excellent early apples best eaten straight from the tree. Red fruit have a pleasantly sharp flavour. Season of use August - September. First introduced in 1949, Essex, UK. Requires a pollinator (another apple). M26

Apples 'Ellis' Bitter'

Medium bittersweet cider variety. Early to fruit Good disease resistance. Drops when ripe. Season of use October. First introduced in Newton St. Cyres, Devon, UK. Requires a pollinator (another apple). Grown on M25 root stock for an ultimate (un-pruned) height 25 ft.

Apple 'Ellison's Orange'

Golden red striped with a pleasing hint of aniseed giving this a distinctive flavour that develops with keeping. An excellent alternative to Cox for Northern England. Makes good juice. Season of use September - October. First introduced in 1904, Lincolnshire, UK. Self fertile. M26

Apple 'Golden Delicious'

Butter gold fruit that is both crisp and juicy. Best eaten fresh from the tree but keeps well. Season of use November - June. First introduced in 1890, USA. Requires a pollinator (another apple). M26

Apple 'Granny Smith'

Firm and crisp. Performs best in a warm situation. Season of use November - April. First introduced in 1868, Australia. Self fertile. M26

Apple 'Howgate Wonder'

Cross between Newton Wonder and Blenheim Orange. An excellent cooking variety Season of use October - March. First introduced 1915, Isle Of White, UK. Requires a pollinator (another apple). MM106

Apple 'Idared'

Good coloured juicy eating apple. Very sweet and tasty with good keeping qualities. Prolific. Season of use November - March. First introduced in 1942, USA. Requires a pollinator (another apple). M26

Apple 'James Grieve'

Very sweet and juicy apples suitable for dessert and cooking. A large fruit with an attractive flushed colour. Season of use September - October. First introduced 1893, Scotland. Self fertile. M26

Apple 'King of The Pippins'

Unsurpassed in flavour, no better Winter dessert apple. Season of use October - December. Self fertile. First introduced 1770, France. M26

Apple 'Lane's Prince Albert'

A late keeping cooker that can also be used for dessert fruit after Christmas. Scab resistant. Season of use October - March. First introduced 1841, Hertfordshire, UK. Self fertile. MM106

Apple 'Laxton's Superb'

An old favourite likened to cox - but a larger fruit! Season of use October - January. First introduced 1897, Bedfordshire, UK. Self fertile. M26

Apple 'Lord Derby'

An excellent cooking apple. Keeps its shape when cooked. Very hardy making it ideal for Scotland and the North of England. Season of use September - December. First introduced 1862, Cheshire, UK. Self fertile. MM106.

Apple 'Lucombe's Pine'

Eating apple with an unusual aromatic pineapple flavour. Season of use October - February. First introduced in 1800, Exeter, UK. Requires a pollinator (another apple). MM106

Apple 'Sops In Wine'

New leaf growth is red in colour, its flowers are a most delicate shade of purple red. The fruits produced are red in colour - even the flesh is stained pink - and its juice will run pink! Suitable for eating, cooking, juicing or cider. Season of use August - October. First introduced 1832, South West England. Requires a pollinator (another apple). MM106

Apple 'Spartan'

Dark red eating apple with crisp white flesh. Very easy to grow and a good pollinator for others. Season of use October - January. First introduced 1926, Canada. Self fertile. MM106

Apple 'Stark's Earliest'

July fruiting. Welcome for Summer fruit salads! Season of use July. Self fertile. M26

Apple 'Sunset'

Very worthwhile variety that ripens to yellow. Similar to Cox but easier to grow. Season of use October - December. First introduced 1918, Kent. Self fertile. MM106.

Apple 'Tremlett's Bitter'

Bittersweet cider variety. Frost resistant blossoms followed by an early heavy crop of deep red conical fruits. Season of use October. First introduced in the 19th Century, UK. Requires a pollinator (another apple). Grown on M25 rootstock for an ultimate (un-pruned) height of 20ft.

Apple 'Winston'

Russet variety. Aromatic flavoured with flushed appearance. First introduced 1920, Berkshire. Season of use October - April. Self fertile. M26.

Apple 'Winter Banana'

Gorgeously sweet apple with a salmon flush to the flesh. Good flavour. A little known apple at its best Dec to Feb. Season of use November - February. First introduced 1876, USA. Requires a pollinator (another apple). M26.

Apple 'Yarlington Mill'

Medium bittersweet ciderapple. Fruit drops when it is ripe. First introduced 1800, Yarlington, UK. Requires a pollinator (another apple). Grown on M25 rootstock for an ultimate (un-pruned) height of 20ft.

Crab Apple 'Butterball'

Gorgeous white, flushed pink blossoms are followed by very heavy crops of 'butter-golden' fruits. Perfect for making crab apple jelly that 'glows'. Season of use: October, Self Fertile. M26.

Crab Apple 'John Downie'

Most popular crab apple for jelly making. Rich orange and red fruit in October. Plant one near your apple trees, especially non self fertile varieties, to ensure good fruit set. Season of use October. Self fertile. M26.

Crab Apple 'Red Sentinel'

Scented white flowers followed by red fruits that remain into the Winter. Plant one near your apple trees, especially non self fertile varieties, to ensure good fruit set. Season of use October. Self fertile. MM106.

Cherries

All Cherries are £19.95 each, 3 for £56.85, 5 or more £18.00 each - and you can mix and match with Apples, Damsons, Pears (except Asian Pears), Plums, Medlars and Gages to take advantage of the quantity discounts.

All our cherries are grown on Colt root stock for an ultimate (un-pruned) height of 8-12 feet but can easily be kept at a height of 6-8 feet.

Cherry 'Early Rivers'

Dark red sweet eating cherries are produced early in the season. Originated from Kent, UK. Requires a pollinator (another cherry).

Cherry 'Merton Premier'

An excellent, early, sweet flavoured eating cherry not to be missed. Requires a pollinator (another cherry).

Cherry 'Morello'

Extremely prolific sour cherry. Very juicy dark red fruit for cooking, pies, jam making and wine! Produce your own Cherry Brandy in the garden shed! Originated from Kent, UK. Self fertile.

Cherry 'Napoleon'

Very large yellow fruits with a deep red flush are produced mid to late season. Very popular as a sweet eating cherry and often referred to as Naps. Originated from Kent, UK. Requires a pollinator (another cherry).

Cherry 'Stella'

A reliable dark red fruited mid to late season variety producing good crops of large, Sweet eating cherries of good quality and pleasing flavour. Originated from Canada. Self fertile.

Cherry 'Sunburst'

A late season eating cherry producing large sweet fruit which is almost black when ripe. Originated from Canada. Self fertile.

Cherry 'Sweetheart'

Eating Cherry. Bright red fruits have a lovely sweet flavour. Very late fruiting, the fruits ripen over several weeks rather than all at once. Self Fertile.

Damsons, Gages & Medlars

All Cherries, Damson & Gages are £19.95 each, 3 for £56.85, 5 or more £18.00 each - and you can mix and match with Apples, Pears (except Asian Pears) and Plums to take advantage of the quantity discounts.

Damson 'Farleigh'

Blue black fruit. A very heavy and reliable cropper. Season of use September. First introduced 1820, Kent, UK. Grown on St Julien A root stock for an ultimate (unpruned) height of 12-15 feet but can easily be kept at a height of 6-8 feet. Self fertile.

Goldengage 'Oullin's Gage'

Large fruits with yellowish skin and flesh tending to be gold. Season of use August. First introduced 1856, France. Grown on St Julien A root stock for an ultimate (unpruned) height of 12-15 feet but can easily be kept at a height of 6-8 feet. Self fertile.

Greengage 'Reine-Claude de Vars'

Greenish flesh of excellent most pleasing flavour. Firm yet very juicy. Season of use August. First introduced 1800's, France. Grown on St Julien A root stock for an ultimate (unpruned) height of 12-15 feet but can easily be kept at a height of 6-8 feet. Self fertile.

Medlar 'Nottingham'

A distinctive and acquired taste from centuries old, and enjoyed by only the gentry around the time of James 1st. Season of use November - December. Best allowed to grow to full height of 12-15 feet. Self fertile. Quince A rootstock.

Plums

All Plums are £19.95 each, 3 for £56.85, 5 or more £18.00 each - and you can mix and match with Apples, Cherries, Damsons, Pears (except Asian Pears), Medlars and Gages to take advantage of the quantity discounts. Grown on St Julien A root stock for an ultimate (unpruned) height of 12-15 feet but can easily be kept at a height of 6-8 feet.

Plum 'Czar'

An old variety. Small round purple blue fruit, very productive and of good flavour. One of the most popular cooking varieties. Does particularly well planted against a sunny wall. Season of use August. First introduced 1871, Hertfordshire, UK. Self fertile.

Plum 'Jefferson'

Of great value in commerce due to its heavy reliable cropping habit. Flesh golden yellow. Excellent dessert variety of good juicy flavour. Season of use late August. First introduced 1825, USA. Requires a pollinator (another plum or gage).

Plum 'Stanley'

A first class blue plum and widely grown commercially due to its cropping potential. Good flavour. Season of use late August. Self fertile.

Plum 'Victoria'

Yellow to red fruit can be as big as a duck egg of oblong shape. Excellent for dessert, bottling and plum jam. The best known of English plums and a very reliable cropper. Season of use late August. First introduced 1840, Sussex, UK. Self fertile.

Pears

All Pears except Asian Pears are £19.95 each, 3 for £56.85, 5 or more £18.00 each - and you can mix and match with Apples, Cherries, Damsons, Plums, Medlars and Gages to take advantage of the quantity discounts. Grown on Quince A root stock for an ultimate (unpruned) height of 8-12 feet but can easily be kept at a height of 6-8 feet.

Pear 'Brandy'

Perry / Cider Pear. Ruddy brown fruits are small and hard - certainly not for eating but perfect for making cider and perry. Compact in habit. Season of use October - November. Requires a pollinator.

Pear 'Clapp's Favourite'

An early pear. Delicious 'melt in the mouth', juicy sweet with a light acid flavour. Also suitable for cooking. Season of use August - September. First introduced 1860, USA. Requires a pollinator.

Pear 'Concorde'

Eating Pear. Yellow green fruits, sometimes blushed red, have sweet and juicy soft flesh. Reliable and heavy cropping. Season of use October - November. Self Fertile.

Pear 'Conference'

Green to bright yellow fruit. Very juicy and sweet. Season of use October - November. First introduced 1885, Hertfordshire, UK. Self fertile.

Pear 'Doyenné du Comice'

A popular and very well flavoured pear. Season of use November - December. First introduced 1849, France. Requires a pollinator.

Pear 'Williams Bon Chrétien'

The King of Pears. Large golden yellow fruit. Extremely sweet and juicy. Heavy cropping. Season of use September. Self fertile.

Almonds, Apricots, Nectarines & Peaches

£21.50 each, 3 for £60.75, 5 or more at £19.50 each

mix and match Almonds, Apricots, Nectarines Peaches to take advantage of the quantity discount.

Grown on St Julien A root stock for an ultimate height of 12-15 feet can easily be kept at a height of 6-8 feet.

Almond 'Robijn'

Gorgeously sweet nuts. Will start fruiting in approximately three years. Self fertile. Prefer a full sun position but will tolerate shade.

Nectarine 'Lord Napier'

Thin skinned, burgundy-red fruits have sweet and very juicy white flesh. Self Fertile. Hertfordshire, UK.

Nectarine 'Madeleine Blanchett'

Medium sized orange-red skinned fruits are gorgeously juicy and sweet. Blossom has a good resistance to frost damage. Self Fertile.

Apricot 'Hargrand'

A new Hungarian variety that is extremely hardy, producing a heavy yield of sweet juicy fruits. Suitable for both greenhouse and outdoor cultivation. Like all apricots, it is not prone to peach leaf curl. Season of use July - August. Self fertile.

Apricot 'Hungarian Best'

Golden-orange fruits, blushed with red, have a dark red, sweet and juicy flesh. Perfect for eating fresh or in preserves. Season of use, July. Self Fertile.

Peach 'Darling'

White skin has a delicate red flush; its white flesh comes away from the stone easily and has a rich flavour. Season of use late August. Self fertile.

Peach 'Jalousia'

Delicious flat peach with sweet, and very juicy, white flesh and a small stone. Also known as honey peaches. Self Fertile.

Peach 'Red Haven'

Orange fruits have a red flush. Flavour-some flesh is firm and yellow in colour. Season of use mid August. Originated from USA. Self fertile.

Asian Pears *Pyrus betulifolia* rootstock. With reach 8-12 feet (2.4-36.mtr) but can be kept at 6-8 feet (1.8-2.4mtr)
Asian Pears are £21.50 each, 3 for £60.75, 5 or more £19.50 each.

Asian Pear 'Hosui'

Billiard ball shaped copper coloured fruits have a traditional pear taste but are often more juicy. Partially self fertile.

Asian Pear 'Kosui'

Large, round, copper coloured fruit with a pear like taste. Juicy but crisp. Partially self fertile.

Asian Pear 'Nijisseiki'

Medium sized, round, yellow fruit with a pear like taste. Fresh, juicy and pleasantly sharp. Partially self fertile.

Asian Pear 'Shinko'

Large, rounded, slightly flattened fruit has a lovely bronze russet skin. Heavy cropping and excellent disease resistance. Partially Self Fertile.

Asian Pear 'Shinseiki'

Round, yellow skinned firm fruits are crisp and very juicy. Stores well. Ripens early August. Partially Self Fertile

Cobnut & Filbert Trees

All £17.95 each, 5 or more £16.95 each

Cobnut 'Princess Royal'

A highly ornamental variety of cobnut. The golden green husks of the nuts are delicately suffused pink. Compact and upright in habit. Requires a pollinator.

Cobnut 'Webb's Prize Cobnut'

A large nut and very heavy bearing. Self fertile. Trees should be kept to a height of 6-8 feet for optimum yield (will grow to 20ft).

Filbert 'Kentish Cob'

The traditional Kentish Cobnut - and still the best flavoured! Large flattened nuts are produced in profusion. Vigorous in habit and heavy cropping. Requires a pollinator.

Filbert 'Nottingham Cobnut'

An early cropping variety that produces large richly flavoured nuts. A popular commercial variety. Partially self fertile.

Ungrouped Fruit Trees

Fig 'Brown Turkey'

Easy and reliable. Suitable for a South West position. Self fertile. Can fruit in the first season. Restriction of the roots will prevent the tree growing too large and keep it fruitful. Supplied as pot grown trees approx 2 ft tall. £16.99 each

Mulberry - Black

Large purplish red sweet, juicy fruit. Self fertile. Pot grown branched bush trees around 3-4ft tall. Best maintained as a 6-8 foot high bush. £29.95 each.

Mulberry - White

A favourite food for the silk moth! Purplish-black, sweet and juicy fruits mid Summer. £18.00 each.

Quince 'Champion'

Huge fruit of a distinctive flavour for jam making, jelly and wine. Season of use October - November. Self fertile. Grown on Quince A root stock for an ultimate (un-pruned) height of 12-15 feet but can easily be kept at a height of 6-8 feet. £21.50 each, 3 or more £20.50 each

Sweet Chestnut 'Marron De Lyon'

French variety that produces very large nuts. Can start producing nuts in just 2 - 3 year. Fairly compact variety, but will grow to around 30ft tall with a spread of 18ft in approx 50 years. Can be kept to around 12ft Plant 20 feet apart. Self fertile. £38.95 each.

Walnut 'Broadview'

This is an outstanding variety of grafted Walnut. Not only is the tree compact in habit (making it suitable for the smaller garden) but it can start producing nuts in the third year from planting. For open ground cultivation only. Plant 15 feet apart. Self fertile. £38.95 each.

Exotics

Avocado

Produces dark purple pebbly-skinned fruits with a lovely creamy interior, delicious raw or cooked. Requires winter protection. Self fertile. **£35.90 each**

Carob

Grown for its sweet, nutritious fruit, Carob can be used as a cocoa substitute. Frost hardy to -7°C. Likes a sunny, well drained position. Self fertile. **£33.90 each**

Cape Gooseberry

Papery husk hide the gorgeously sweet fruits of this shrubby plant. Also known as Golden Berry and Jam Fruit. Require Winter frost protection. Compost block grown plants **1 plug £2.25, 5 for £9.75.**

Dwarf Mango

Produces heavy crops of purple-red fruits. Self Fertile. Requires Winter frost protection, but well suited due to its smaller size. **£39.90 each.**

Dwarf Pomegranate

Beautiful little tree, with petite leaves, flowers and fruits. Amazing twisting trunk. Makes an excellent bonsai tree. Produces lovely red/brown fruit. 1ltr pot **£19.95 each**

Elderberry

Masses of heavily scented cream flowers in the late Spring can be harvested to make Elderflower Cordial or even Elderflower Champagne or leave to flower and then produce berries that can be used for homemade wines, jellies or preserves. Self Fertile. **£8.95 each**

Japanese Bitter Orange

Or Trifoliolate Orange. Winter hardy to -20°C. Covered in large spiteful thorns. Small (1½" dia.) fruits, bitter in taste, perfect for marmalades. Prefers a full sun position but will tolerate partial shade. Likes well drained, just acidic soil. Will reach 4ft - 5ft tall after 10 yrs with a spread of 4ft. Pot grown, **£9.85 each.**

Goji Berry

Eat them fresh (shake them from the plant to prevent your hands oxidising them and making them go black). Self fertile and hardy to all extremes of climate -15°C - +40°C. Drought tolerant, needs good drainage. **Potted £5.95 each.**

Blood Orange 'Sanguinelli'

Spineless. Evergreen. Blood red flesh. Required Winter frost protection. Approx 4ft tall.

Calamondin

Citrus cross between mandarin orange and kumquat, with beautiful variegated, cream-edged leaves, highly scented flowers and edible fruit. Usually grown here for its ornamental appeal.

Caviar

Also known as the Finger Lime. Produces long, bright green, thin fruits filled with tiny juicy pearls that taste of lime and look like caviar. Self fertile.

Grapefruit

Fine quality grafted trees stand approx 2ft tall now. Can be grown outside during the Summer but does require frost protection during the Winter months.

Guava

A lovely self-fertile, evergreen tree that produces pear-shaped green/yellow guava fruits. Requires winter frost protection and a sunny position to thrive. **£18.95 each**

Loquat

Eriobotrya japonica Grows into a handsome garden tree with large attractive leaves. Evergreen in habit. In our experience it is hardy. **1ltr potted plants £15.60 each.**

Lychee Tree

Clusters of creamy flowers are followed by red lychee fruits that are sweet and juicy. The bark of the tree is grey-black and quite attractive. Self Fertile. **£47.95 each.**

Macadamia Nut Tree

Produces a lovely tree with white/pink flowers followed by delicious macadamia nuts. Requires Winter frost protection and can reach 32 feet tall. **£47.95 each.**

Mango Tree

Large oval fruits with rich, sweet flavour. Great for juicing and drying. Originated from India and Asia. Self fertile. Requires Winter frost protection. **£35.90 each.**

Natal Plum

Sweet and sour flavoured red plum from South Africa full of vitamin A, B and C. Lovely perfumed flowers (particularly at night). Requires a minimum temperature of -5°C. **£32.95 each.**

Olives

Silver-grey shiny foliage and the gnarled effect its trunk and branch work take on make this a beautiful tree. Requires Winter frost protection. A sheltered sunny position in the Summer ensures proper fruit ripening. Green Olives are the un-ripened fruit; black olives arise they fully ripen. **1ft tall. £15.95 each.**

Papaya

Lovely trumpet like, yellow-white flowers (which are moth pollinated) are followed by the delicious papaya fruits. Evergreen. Self Fertile. **£12.95 each**

Citrus

£39.95 each or £35.95 when ordering 3 or more.

Kumquat

Evergreen. Sweet skin, sour flesh. Hardy to about -10°C, but prefers frost protection. Approx 4ft tall.

Lemon

Quality grafted trees stand approx 4ft tall now. Can be grown outside during the Summer but does require frost protection during the Winter months.

Lime

Quality grafted trees stand approx 4ft tall now. Can be grown outside during the Summer but does require frost protection during the Winter months.

Mandarin Tree

Medium-sized fruits. Slightly pebbled thin reddish-orange rind that is easily peeled. Flesh is dark orange, fine-textured, and juicy with a sweet, rich flavour. Self fertile. Needs Winter frost protection. 2-3ft tall now.

Passion Fruit (Passiflora edulis).

Climber, will self cling. Early Summer brings a flush of attractive flowers followed by large passion fruits. Allow one or two trails to grow in a greenhouse of conservatory for early fruit; Winter hardy, though may be killed off down to the ground in very hard Winters - to re-grow from the roots. **£18.95 each, 3+ £17.50 each.**

Persimmon

Extremely attractive, slow growing tree with a sweet/spicy fruit that requires Winter frost protection when young. The fruits are high in Vitamin C and glucose. **£39.95 each.**

Pineapple Guava/Fruit Salad Tree

Also known as Guava or Feijoa. Produces edible fruits that taste of plum, apple, peach, strawberry and pineapple all rolled into one. Hardy to -12°C - fruits will only ripen outside in long hot summers or in a conservatory. **£7.25 each**

Pomegranate

Bright scarlet flowers are followed by the familiar golden skinned fruits that hide the sweet juicy red crimson flesh. Considered by many to be frost tender these will actually take mild frosts occasionally. 3-4ft tall. **£29.95 each.**

Star Fruit

Delightful, evergreen, ornate bush which requires Winter frost protection and grows fruits, which when cut at a cross section look like stars. **£39.95 each.**

Sweet Granadilla Vine

Delicious edible orange fruit, eat the pulp which is sweet and delicious after a stunning flower. Requires Winter frost protection and preferably training. **£18.95 each**

Tamarillo Tree Tomato

Required Winter frost protection. Will tolerate min temp. 40°F. Fruit resembles Victoria plums. In the UK it can fruit for 7 months of the year. Reaches about 8ft high and leaves can reach up to 2ft in length! Before the onset of fruit delightfully scented flowers appear. Extremely fast growing. Need good nutritious soil and full sun. Can fruit prolifically year after year. **10 seeds £3.20. Pot Grown Plants £7.95 each, 3 or more £6.95 each.**

Mediterranean Sweet Lemon

Also known as Sweet Lime! Produces rounded fruits of a light orange yellow colour. The flesh is greenish in colour and has a slightly sweet rather than acidic flavour - as does the juice. 4ft tall now

Orange Tree

Closely related to the Navel Orange. Seedless fruits are medium to large and have thin skin, almost smooth skins. Richly flavoured. Early to ripen. Self fertile. Requires Winter frost protection. 2-3ft tall now

Yuzu

Hardy citrus that is very popular in Japan and Korea. Likes a full sun, sheltered and well draining location. Commonly used in cooking and for it's healing properties.

Soft Fruit

Honeyberry

Superfruit. Not fully self fertile so growing several will improve fruit set. Very Hardy. Easy to grow. Taste gorgeous! Similar to a wild blueberry dipped in honey! Fruits start appearing from approximately late June each year. **£12.95 each, 3 or more £12.45 each.**

Jostaberry

Hybrid cross of Gooseberry with Blackcurrant which has resulted in a reliable plant that produces crimson black round fruits that look like large black currants - very nutritious! Bare root bush approx 12-18" tall. **£9.95 each, 3 or more £8.95 each**

Sloes

Of course used for Sloe Gin! Can be used as a hedging plant (plant 2 feet apart). Bare root plant approx 2 feet tall. **£4.95 each, 5 or more £4.50 each, 10 or more £3.95 each.**

Blackberries, Dewberries, Japanese Wineberries, Loganberries, Tayberries & Boysanberries

£12.95 each, 3 or more £11.95 each. Mix and match.

Blackberry 'Black Butte'

Traditional 'thorned' blackberry. It has huge fruits with excellent flavour and firm texture. Fruits are known to weigh as much as 12g. Very vigorous. Crops mid July to late August.

Blackberry 'Black Satin' (Thornless)

Before the fruit you will have a lovely display of pink flowers too! Crops mid July - late August. Pot grown about 2ft tall.

Blackberry 'Karaka Black'

Fruits are exceptionally large firm berries with an average berry weight of 10g most attractive deep shiny black packed with flavour. Crops early July-early September. Pot grown approx 3 ft tall.

Blackberry 'Loch Ness' (Thornless)

Compact habit with good size fruit (up to 4g each). Fruits mid September. Pot grown approx 2ft tall.

Blackberry 'Oregon Thornless'

Very ornamental leaves. Produces traditional round shaped berries late Aug-Sept. Plant 6ft apart.

Boysenberry (Thornless)

Exact parentage is open to debate; it's either a cross between a blackberry, raspberry and loganberry or a loganberry and dewberry. Produces consistently sweet reddish-black berries that ripen from late June onwards. Pot grown plant approx 3 feet tall.

Chocolate Vine

Rambling and scrambling climber that produces pretty chocolate-scented purple flowers that are followed by unusual sausage shaped fruits. Semi Evergreen.

Chokeberry 'Nero'

Hardy and self fertile. Nero reaches about 4 feet tall with large black berries and has stunning red Autumn foliage. Fruits make lovely pies, jams, jelly and wine.

Chokeberry 'Viking'

Hardy and self fertile. Pretty white Spring flowers are followed by an Autumn crop of large black/purple berries which are great for juice or jam. Has stunning Autumn leaf colour.

Fourberry 'Black Pearl'

Breed for it's beautiful colour. Sweet, juicy blackcurrant like fruits. Scented. Attractive foliage. Hardy.

Japanese Wineberry

Climbing shrub that produces large trusses of unbelievably sweet orange red to dark red berries of delicious flavour. Easy to grow and a good subject to grow against a fence. Pot grown plant approx 3 feet tall.

Loganberry LY654 (Thornless)

Hybrid cross of blackberry and raspberry. Delicious long cone shaped berries best eaten when they have mellowed to a burgundy red colour. Pot grown approx 3ft tall.

Tayberry

Deep purple red long fruit in July and August. A very popular rambling fruit of good flavour.

Tayberry 'Buckingham' (Thornless)

Deep purple-red fruit of good flavour in July and August. Individual fruits can be up to 2" long.

Tummelberry

Hybrid berry. Produces large rounded fruits with a bright red colour and superb flavour. Heavy cropping and excellent winter hardiness. Self fertile.

Bilberries & Mountain Cranberries

£8.95 each, 5 or more £8.50 each. You can mix and match to obtain quantity discount.

Bilberry

Closely related to the Blueberry, they also contain concentrations of antioxidants and phytochemicals. Also known as Huckleberry, Bleaberry, Whortleberry, Whinberry and Airelle! Growing up to around 3ft in height. Plant 4-5ft apart. Ericaceous so will require soil or compost

Mountain Cranberry

Also known as Lingonberry or Cowberry. More productive than a normal Cranberry. Fruit usually matures in two flushes - late July and late September. Plant 4ft apart.

Blueberries & Cranberries

£12.95 each, 3 or more £12.45 each, 5 or more £11.95 each. You can mix and match to obtain quantity discount.

Blueberries

All the varieties have clusters of delicate white bell flowers in the Spring are followed by juicy blueberries. They are extremely nutritious and have a high vitamin content. Plant 4-5ft apart. Ericaceous so will require soil or compost of an acidic nature.

Blueberry 'Bluecrop'

Fruits from late July onwards.

Blueberry 'Goldtraube'

Fruits from early July onwards.

Blueberry 'Jersey'

Fruit from late July onwards.

Cranberry 'Early Black'

Popular American variety that produces large juicy red Cranberries delicately tinged black. Growing to around 2 ft tall, evergreen, does best in full sun or semi shade position, and must have an ericaceous soil or compost.

Currants

£8.95 each, 3 or more £7.95 each - and you can mix and match to obtain quantity discount.

Black Currant 'Ben Lomond'

A strong grower producing large fruits of vitamin rich black currants. Mildew resistant. Plant 5 ft apart.

Blackcurrant 'Ebony'

Fruits early July with large firm, sweet fruit. Resistant to mildew.

Red Currant 'Rondom'

Very prolific red currant. Enormous fruit trusses. This variety is quite exceptional. Plant 5ft apart

Red Currant 'Rovada'

Fruits towards the end of the season with long strigs of large bright berries. Good flavour.

White Currant 'White Pearl'

Excellent flavour, heavy cropping. Reliable in every way. The pies and jams you make with these turn to a lovely honey gold colour.

Currant Special

One Black, One Red and One White Currant. Bare rooted. **£21.50 per collection.**

Gooseberry

Bare-rooted 12-18" tall. £8.95 each, 3 or more £7.95

'Hinnonmaki Red'

Virtually immune to mildew. Produces heavy crops of red purple fruit of excellent quality.

'Invicta'

A vigorous green fruited variety. Mildew resistant. Good spreading habit and very heavy yielding, excellent flavour.

'Hinnomaki Yellow'

Mild-season, very hardy variety bred in Finland. Has a spreading habit, will benefit from some support. Produces medium to large yellow fruits that are famous for their aromatic flavour with a hint of apricot. Virtually resistant to Mildew.

'Pax'

Vigorous grower. Virtually spineless. Sweet, large red fruit. Good mildew and leaf spot resistance. Crop approx July.

Traffic Light Gooseberries

One Hinnonmaki Red, One Hinnonmaki Yellow and one Invicta. **£21.00.**

Kiwi's & Baby Kiwi's

£14.95 each, 3 or more £12.95 each (mix & match the baby kiwi's to obtain quantity discounts)

Baby Kiwis

Also known as 'Cocktail Kiwi', 'Kiwi Berry' or 'Hardy Kiwi' as they can stand temperatures as low as -25°C (-13°F)

Kiwi Fruit 'Jenny'

Self fertile. Produces an abundance of fruit in the late Summer. Can be grown outside as can be seen at the Wisley RHS Gardens. You can also grow partly under glass by leading trails into a conservatory with the plants in the open as you would say a vine.

Ken's Red

Female (needs a male for pollination). Fruits are fairly large and almost cylindrical, tapering to a point. After picking the fruits they continue to stay firm and do not bruise that easily, making it perfect for those who want to sell or short term store. With support climbs to around 26ft (8 metres) tall - can be controlled with pruning.

Weiki

Whilst this variety does not produce fruit (being male) it makes up for this in more than one way. Its most important use is to provide pollination for female varieties; as a side benefit it is a very attractive climber in its own right - and recognised as the most ornamental cultivar of the species. With support climbs to around 26ft (8m) tall - can be controlled with pruning.

Issai

Self fertile. Whilst the fruits are fairly small yield can be prolific, a mature plant producing literally hundreds of fruits, and up to 1000 is not unusual. Smooth skinned, the fruits do not need peeling either. Compact in habit - climbing (with support) to around 12ft (3.65m) tall - can be controlled with pruning.

Jumbo

An Italian female (needs a male for pollination) variety that produces exceptionally large, oblong, yellow-green fruits that are ready for harvest late September - mid October. With support climbs to around 26ft (8m) tall - can be controlled with pruning.

Strawberries & Alpine Strawberries

'Rambling Cascade' Climbing Strawberry

Produces long runners (up to 5-6ft long) that can be trained to trellis, canes or around a stout pole. The flavour of this variety is quite exceptional and surpasses the taste or any bred 'for long shelf life' commercially grown strawberry.

5 plants £8.25, 10 for £13.50, 25 for £31.25

Rambling Cascade Hanging Basket

Complete with 13 plants, compost and basket. **£25.95 each.**

Strawberry 'Sweet Temptation'

Compact plant with a 'normal sized' fruit. **£2.65 per 25 seeds.**

Tumbleberries

Heavy cropping Remontant or alpine Strawberry that produces delicate sized fruit of superb flavour. Plant 10"-12" apart anytime. Will grow in semi shade. Can fruit in Winter given cloche protection. The little Strawberry with the big flavour. Popular in France. Makes an excellent ground cover plant. **5 plants for £8.75, 10 for £15.00, 25 for £31.25.**

Below varieties 5 plants of one type £7.50, 10 for £12.50, 25 or more £1.15 each

Malwina

Late fruiting, July to August. Produces large deep red fruit with a beautiful gloss, lovely and sweet! Good resistance to Verticillium Wilt, Crown Rot, Red Core & Mildew. Self fertile.

Mara des Bois

Self-fertile. Popular with chefs for its intense alpine flavour by traditional medium sized fruit. Perpetual, red fruit from July to October. Often seen in France.

Royal Sovereign

Plants are not as large as modern varieties and the yield a little smaller its superb flavour makes up for this a wonderful traditional flavour. Wonderful for both growing in pots as well as the open ground. Self fertile.

Snow White

Self-fertile. A strawberry with a difference, the fruits are white and less likely to get eaten by the birds! Has a pineapple like flavour with a good yield. A real talking point.

Raspberries

All raspberry varieties must be purchased in 5 of one type minimum. 5 for £9.75, 10 for £18.00, 25 for £40.00, 50 for £75.00, 100 for £130.00

Raspberry 'All Gold'

Also known as 'Fall Gold'. Old variety that almost crumbles in your hand when you pick it. Delicious. Fruit is gold in colour. Primocane. Late Summer fruiting.

Raspberry 'Autumn Bliss'

Heavy cropping. Produces fruit of good colour and excellent flavour. Resistant to raspberry root rot. Pick mid August - late September. Primocane.

Raspberry 'Autumn Treasure'

Large conical fruits with striking bright colour, packed with juicy sweet flavours. Firm in texture which keep well. Pick early August - end of September. Resistant to Verticillium Wilt and Powdery Mildew, excellent tolerance to Root Rot. Primocane.

Raspberry 'Glen Ample'

High yielding mid season variety producing berries of excellent quality, size and flavour. Pick early July - August. Floricane.

Raspberry 'Malling Minerva'

Summer fruiting. Conical shaped firm fruit. Freezes well. Pick mid June - end of July. Floricane.

Raspberry 'Tulameen'

Very high yielding late season. Large fruit which is dark pink in colour. Pick mid July - mid August. Floricane.

Ultimate Raspberry Collection

5 Malling Minerva (early), 5 Glen Ample (mid-Season) 5 Tulameen (late). **£26.95 per collection**

Glen Coe 9cm pots £9.95 each

Summer fruiting (floricane). Self Fertile. Delicious, intense dark purple fruit with a more bush / clump forming habit than usual raspberry canes. Great for jams and sauces too.

Seeded Grape Vines

All £13.50 each, 5 or more £13.00 each, 10 or more £12.50 each, 25 or more £12.00 each, 50 or more £11.00 each

White

Bacchus

Eating / Wine Grape. A fine quality with distinct flavour and good habit. Suitable for outdoor and protected cropping.

Chardonnay

Eating / Wine Grape. Gorgeously sweet golden grapes. Suitable for outdoor and protected cropping.

Chasselas Dore De Fontainebleau

Eating / Wine Grape. Sublimely flavoured sweet golden fruits. Suitable for outdoor and protected cropping. Self Fertile.

Chenin Blanc

Wine Grape. Smallish green fruits, perfect for crisp dry whites. Recommended for protected growing only.

Huxelrebe

Eating / Wine Grape. Large yellow fruits packed full of sugar with a delicate Muscat flavour. Early to ripen. For outdoor and protected cropping.

Madeleine Angevine

Eating / Wine Grape. Sweet Citrus flavoured golden white fruits. Well suited to the North. Suitable for outdoor and protected cropping.

Macabeo

Wine grape. Large fruit is often used to make Rioja and Cava. High yielding with fairly neutral acidity, best grown under protection.

Red / Black

Black Hamburgh

Eating / Wine Grape. Large, thin skinned, black fruits have a gorgeously sweet flavour. Recommended for protected growing only.

Eating / Wine Grape. Sublimely sweet rosy red fruits are perfect for both wine making and eating. Suitable for outdoor and protected cropping.

Dornfelder

Eating / Wine Grape. Heavy cropping, producing large bunches of rich black fruits. Suitable for outdoor and protected cropping.

Gamay

Wine Grape. Purple black fruits are perfect for making juice and light fruity red wines. Recommended for protected growing only.

Grenache

Wine Grape. Great for those making home made wine, the blue / black grape has a high sugar and alcohol content. Often used to make Chateauf-neuf-du-pape.

Muller Thurgau

Eating / Wine Grape. Golden grapes are overloaded with sweet sugary flavours. Suitable for outdoor and protected cropping.

Muscat Saint Vallier

Eating Grape. Large green fruits have a subtle muscat flavour. Suitable for outdoor and protected cropping.

Muscat d'Alexandria

Eating / Wine Grape. Gorgeous golden fruits have a sweet Muscat flavour and scent. Recommended for protected growing only.

Parellada

Wine grape. White fruits with a fresh apple/nectarine flavour. One of the main grapes used to make Cava. Likes a long growing season, we suggest protected growing.

Phoenix

Eating / Wine Grape. Large green fruits and good disease resistance. Suitable for outdoor and protected cropping.

Pinot Blanc

Wine Grape. Lovely green grape that matures to pale purple blush. Suitable for outdoor and protected cropping.

Pinot Gris

Wine Grape. Grey-blue fruits. Perfect for crisp dry everyday white wines. Suitable for outdoor and protected cropping.

Gewurztraminer

Eating / Wine Grape. Pinky red grapes have a delicious spicy flavour. Suitable for outdoor and protected cropping.

Kentish Claret

Eating / Wine Grape. Almost black grapes are perfect for eating, wine or jams. Suitable for outdoor and protected cropping.

Merlot

Wine Grape. Purple blue grapes have a soft plummy flavour. Recommended for protected growing only.

Pinot Meunier

Eating / Wine Grape. Rich purple black fruits suitable for wine and eating. Suitable for outdoor and protected cropping.

Pinot Noir

Eating / Wine Grape. The noble grape of Burgundy and Champagne; eats well too. Rich black fruits. Suitable for outdoor and protected cropping.

Regent

Eating / Wine Grape. Deep red fruits ripen early. Popular wine grape but also excellent for eating. Suitable for outdoor and protected cropping.

Saint Laurent

Eating / Wine Grape. Almost black grapes are perfect for eating and winemaking. Suitable for outdoor and protected cropping.

Reichensteiner

Eating / Wine Grape. Golden fruits become extremely sweet as they ripen. Excellent for cooler parts of the Country. For outdoor and protected cropping.

Riesling

Eating / Wine Grape. Classic wine grape of Germany. Sweet golden yellow fruits. Recommended for protected growing only.

Sauvignon Blanc

Wine Grape. Large green fruits are perfect for making a wide variety of wine styles. Suitable for outdoor and protected cropping.

Sémillon

Wine Grape. Small bright green grapes are packed full of juice. Suitable for outdoor and protected cropping.

Seyval Blanc

Eating / Wine Grape. A reliable white grape with good disease resistance, highly recommended. Suitable for outdoor and protected cropping.

Verdejo

Wine grape. A white variety that likes the high altitudes of Spain and is usually harvested at night. Produces wine with a honey and nutty flavour and is full bodied.

Champagne Collection

1 Chardonnay & 1 Pinot Noir Vine & recipe. £25.95

Schönburger

Good flavoured plum coloured grape with a very high sugar content. For both indoor and outdoor cultivation.

Siegerrebe

Eating / Wine Grape. An intensely sweet and aromatic variety producing delicious plum coloured grapes. Suitable for outdoor and protected cropping.

Syrah

Wine grape. Also known as Shiraz, grows with thick skins and flavour changes depending on climatic conditions.

Tempranillo

Wine Grape. A popular variety grown in the North of Spain, producing deep blue/black grapes with seeds. Can be grown with or without protection.

Triomphe d'Alsace

Eating / Wine Grape. Early, hardy and disease resistant. Perfect for Northern gardeners. Suitable for outdoor and protected cropping.

Seedless Grape Vines

All £13.95 each, 5 or more £13.45 each, 10 or more £12.95 each, 25 or more £12.45 each, 50 or more £11.95 each

Flame

Eating Grape. Dark red seedless fruits have a lovely crunchy texture and are full of juice. Suitable for outdoor and protected cropping.

Lakemont
