Discounts For Schools & Children

We are so very happy to offer Schools and children's projects a blanket discount of 20% on seed and plant orders and 10% on garden tool and sundry orders (this discount does not extend to the carriage element of any order). To claim, simply quote SCHOOL . Please note, to qualify for the discount we will require some verification of your project.

Discounts For Community Projects

We are happy to offer Community Gardening Projects and Schemes a discount of 12% across our entire product range (this discount does not extend to the carriage element of any order). To claim, simply enter COMMUNITY on the discount code page and detail the Community Project in the Special Instructions box of our checkout. We would, of course, very much appreciate being kept up to date with progress! We reserve the right to 'spot check' the validity of projects.

Growing Is Easy & Fun!

(with a little help from Victoriana)

*Victoriana Nursery Gardens
is a family run business with a
wealth of knowledge both in horticulture
and working with children.*

Why Should Children Garden?

To teach children about growing their own food, in our opinion, the most important life skill of all, everyone needs to eat!

The removal of gardening from the school syllabus in the late 50's is the reason why there is such a knowledge void in the younger generations.

How Can We Help?

With a wealth of knowledge spanning four generations we are able to offer advice and ideas to all - from the lone amateur, to School Gardening Clubs and Community Gardening Projects.

By working with community groups, children and schools we hope to help break this vicious circle and get children learning this most important life skill once more.

What Else Do We Do?

Of course we don't just work with schools we work with other organisations and individual people too.

We are now running children's gardening workshops which are a huge success and we are considering running adult classes, so if it is something you are interested in please enquire!

We have display vegetable, herb, soft fruit and floral gardens here at the nursery and on certain days throughout the year have special opening days where you can taste the fruits we grow and decide if you might like to grow it yourself! Tomato and Chilli days are our most popular.

Everything we grow is done naturally, in our opinion it's the best way to be.

We welcome visitors six days a week. For those wishing to discuss projects in more depth or visit as a school we would ask that you make a prior appointment please.

Fact - Most children love to get dirty! Put this to good use and get them out in the garden where they learn without even realising it - making it easy and pleasurable to teach!
